

## Dry coolers

### DCO2400 Dry Cooler

The dry cooler is a cooler in which the process water is passed through a cooling block and cooled by ambient air. This is done by a forced air flow over the cooling block. This with an infinitely variable ventilation control. This unit can also be used as a heater. The unit is ready to plug in and easy to install due to the use of shortcuts. The unit can easily be moved with a forklift truck.
